

Save Us, the Endangered

Hello! I am a tiger. I have black stripes all over my body and I am very big too. I live in Southern Asia. I eat meat and sometimes fruits.

Each one of us has a unique stripe pattern, just like humans' fingerprints.

There are not many of us left in the world. Humans have destroyed our habitats, because of which we have no place to live. Another reason is that people sell our babies and kill us. Therefore, our number is decreasing.

Please stop killing us and keep us from getting extinct! Please protect wildlife and please recycle, reduce and reuse natural resources. Please keep us alive! Thank you.
