

School Showcase

Special thanks to the following three schools for showcasing their school-based teaching and learning projects on ELT Day. Teachers from the schools exchanged teaching and learning ideas with the visitors. All of them had very fruitful conversations!

St. Andrew's Catholic Primary School

Ms Tang, the English Panel Head, together with two Primary 6 students, Amos and Genghis, shared about English Activity Day at their school. They showed various booth games for students to **learn from play**. The games consisted of English elements — vocabulary building, matching skills and reading comprehension. One of the games named 'Astronaut', which combined the elements of English and STEM, attracted quite a lot of visitors to their booth. Amos and Genghis shared with the visitors by demonstrating the games.

This was a valuable opportunity for the students to join ELT Day. They introduced what they did at school on English Activity Day and interacted with the visitors. Such experience helped students develop confidence as they needed to speak up in front of the guests and to openly share with them. Visitors were impressed by their enthusiastic attitude and their fluent English.

“Students talked about their experience of the activity day at their school. It was a good chance for them to express themselves in front of people outside of the classroom.”
